

Learning Potential Program

Opportunities Program for Preschool Students at Montage

Afternoon time for our Preschoolers needs to be a time of exploration and discovery. They will be doing their own program after school so that it is more appropriate to their readiness level. This is also the perfect time of day to focus on some specialized programs that develop their fabulous learning potential.

One of the Programs we had become famous for as a private preschool was from the Glenn Doman methodology used at his Institutes for the Achievement of Learning Potential. Many companies have brought aspects of that program more into the public eye this year with their own materials. We are going to pull together all of those great resources to give our children the best of all the worlds. Many of the programs will be done during the morning time, as well as in the afternoon.

Our Learning Potential Program will include the:

- * Outside Discovery Learning Environment
- * Gardening Program
- * 'Cooking w/ Food You Grow' Program
- * Building and Construction
- * Art and Color Exploratorium with Science Art
- * Science Discovery through Cooking
- * 'Teach Your Child to Read' Program
- * 'Lyric Language' Foreign Language Program: Spanish, Japanese, French, Chinese, Italian
- * 'Bits of Intelligence' Program
- * Word Power Program
- * Math Flash Card Program
- * Drama
- * Creative Movement

We will forward a Lesson Plan and Newsletter each month letting you know about the focus in each area.

GREAT TIMES DISCOVERING!
